

Using Trixbox to receive calls from Skype users and/or your Skype In

Contributed by Kevan

This HOWTO assumes that you have completed the Setting up Trixbox with Skype HOWTO .Also check out the HOWTO for placing outbound PSTN calls via Trixbox and Skype

- 1) If you want to take inbound calls from regular phones, sign up for SkypeIn . Click here to go to the Skypein order page. To take calls from Skype users continue to step 2.
- 2) Connect to the web interface on your Trixbox server with /admin after the url. eg. <http://server.com/admin>
- 3) Click on the Setup link and then click the Inbound Routes link on the left hand side.
- 4) Enter skype1 in the DID Number field.
- 5) Scroll down and pick the destination that you would like the inbound Skype calls to go to.
- 6) Click the Submit button at the bottom of the page.
- 7) Click Apply Configuration Changes at the top of page.
- 8) Make an inbound call via Skype or your SkypeIn number.
